DID YOU KNOW?

A common question asked of us here at the Tehama County Solid Waste Management Agency is **"Why is it necessary to recycle televisions?"** This is a great question. It's important to recycle TV sets properly because many older sets contain up to 8 pounds of lead in addition to plenty of other potentially hazardous materials such as **mercury, cadmium and chromium** to name a few. Many of the newer flat screen televisions contain multiple hazardous materials and heavy metals as well. When you consider that an estimated **16,000 televisions** will be purchased in Tehama County this year alone and approximately **4,200 more will be discarded** you can certainly understand the importance of recycling your television. So, how can you recycle your television?

Here are a few options:

- 1) Before you discard it, see if you can donate your working television to a charity, school, church or community group.
- 2) Some retailers will take back your old TV for free -- regardless of where you bought it. Just ask.
- 3) E-waste recycling events are a great way to free yourself of unwanted televisions at no charge.

Working together we can make a difference!

For more information on where you can recycle your television or any other electronic items in Tehama County or other programs available to Tehama County businesses and residents, visit www.tehamacountylandfill.com or call 528-1103.

Questions?

Please call the Tehama County Solid Waste Management Agency at 528-1103, visit <http://www.tehamacountylandfill.com> or email us at tehamacountyrecycles@co.tehama.ca.us.

As always, please **do not forget to recycle!**

It's good for the County and good for the wallet.
