Tehama County Department of Agriculture/Weights & Measures

**To: Karen Ross, California Department of Food and Agriculture Secretary
and
The Honorable Board of Supervisors, Tehama County**

It is my pleasure to present the 2012 Tehama County Agricultural Crop Report. As required by Section 2279 of the California Food and Agricultural Code, this annual report provides a statistical description of Tehama County's agricultural production. All figures in the report represent gross returns only and do not reflect net income of producers.

The total gross value of Tehama County agricultural production in 2012 was \$294,999,100 a 20.1% increase from 2011 values and another new county record. Tehama County agriculture also realized its first 100 million dollar crop, with walnuts posting a value of \$103,415,100.

Orchard crop's top four commodities, walnuts, table olives, prunes and almonds, cumulatively accounted for 67% of the total agricultural production value. Walnuts increased 10.3% due to acreage and price increases. Table olives dramatically rebounded from last year's weather disaster and posted a 926.9% value increase. Almonds 19.8% increase is attributed to increased production and prices, while prune values decreased slightly because of both acreage and production reductions.

Other noteworthy changes include cattle values increasing 7.9% as strong prices continue to increase while milk values decreased 15.7% due to slight production and significant price decreases. Field crops increased 8.8% in value with wheat contributing a 67.9% increase and corn and alfalfa hay adding 38.5% and 29.6% increases respectively.

My sincere appreciation is extended to the growers, processors, government agencies, and others that provided information used in preparing this report, as this publication would not be possible without their combined efforts.

I wish to thank my staff that assisted in compiling this report with special recognition to Marcie Skelton for the report's coordination and production.

Respectfully Submitted,

Rick Gurrola
Agricultural Commissioner

Tehama County Board of Supervisors

Steve Chamblin	Supervisor - District 1, Vice Chair
Sandy Bruce	Supervisor - District 2
Dennis Garton	Supervisor - District 3, Chair

Annual Sustainable Ag Report

In accordance with Section 2272 of the California Food and Agriculture Code, this Crop Report includes a brief account of efforts, which are being made to exclude or eradicate exotic pests; and to best manage those which already exist, in a manner most conducive to the protection of our environment.

Tehama County land encompasses 1,904,640 acres, which are surveyed by our department for invasive noxious weeds of limited distribution. In 2012, three 'A' rated noxious weeds, of limited distribution were under eradication. The 'A' rated plants include Skeleton Weed, Dalmatian Toad-flax, and Spotted Knapweed. Limited control treatment of the 'B' rated Oblong Spurge, Whitehorse Nettle, Perennial Pepperweed, White Top, and Canada thistle also occurred in 2012.

During 2012, 78 high-risk shipments were inspected for compliance with quarantine requirements, none of the shipments were rejected. During the year, 2,347 various shipments were certified for export to countries around the world.

Pest detection trapping for Mediterranean Fruit Fly, Oriental Fruit Fly, Melon Fly, Japanese Beetle, and Gypsy Moth consisted of 317 traps being deployed, resulting in no finds. One hundred twenty-six Glassy Winged Sharpshooter traps were placed in Tehama County. One hundred fifty-five incoming nursery shipments from counties with Glassy Winged Sharpshooter and/or Light Brown Apple Moth were conducted, resulting in no finds. Tehama County continues to actively monitor for the Light Brown Apple Moth; in 2012 there were 73 traps deployed throughout the county with emphasis on nurseries and fields destined for the global market. Additionally, 13 European Grapevine Moth traps were placed into commercial grape vineyards in Tehama County.

There were 35 registered organic growers in Tehama County in 2012, totaling 12,500 acres of registered organic land. These growers range from small gardens catering to local Certified Farmer's Markets to large-scale livestock, dairy, orchard and field crop producers.

Tehama County Exports

In 2012 Tehama County Issued **2,347** USDA Phytosanitary Certificates

What is this? Phytosanitary is a word that means “of or relating to the health of plants”, so a Phytosanitary certificate is documentation stating said plant or plant product, is free from pests and diseases that are part of the import requirements imposed by countries. Import requirements are designed to protect the importing countries’ agricultural industry from insects and diseases which have the potential to arrive with the shipment, additionally ensuring a higher quality product when it reaches its destination.

Products Exported from Tehama County:

**Almonds, Walnuts, Walnut Shells, Walnut Logs, Olives,
Raspberry Plants, Blackberry Plants, Blueberry Plants,
Strawberry Plants, Prunes, Lumber, & Figs**

Tehama County shipped products to the below countries in 2012:

Algeria	Argentina	Australia	Austria	Belgium
Brazil	Canada	Chile	China	Colombia
Costa Rica	Cyprus	Ecuador	Egypt	Finland
France	Germany	Greece	Guatemala	Hong Kong
India	Indonesia	Israel	Italy	Japan
Jordan	Korea	Kuwait	Latvia	Lithuania
Malaysia	Malta	Mexico	Morocco	Netherlands
New Zealand	Norway	Oman	Pakistan	Panama
Philippines	Portugal	Saudi Arabia	Singapore	South Africa
Spain	Sri Lanka	Sweden	Switzerland	Taiwan
Thailand	Turkey	Ukraine	United Arab Emirates	
United Kingdom	Uruguay	Venezuela	Vietnam	Zimbabwe

Welcome to Tehama County!

Tehama County is rolling out the welcome mat, we want your visit to be enjoyable, memorable, and to become a destination that you'll want to return to soon! A few years ago a group of citizens banded together to get things geared up for our guests. An expert was hired to guide and focus the group in order to help us reach our fullest potential here in Tehama County. Professional signs are being made depicting our newest branding effort, a visitor's center is about to open in Red Bluff, and maps have been made showing everyone the best spots to sample the products of our lands.

The Tehama Trail guide is a map that highlights the locations that are opening their doors to the public to showcase agricultural goods and to tell the story behind that product. The Trail includes stops to show how olive oil is made, where the walnut trees grow in the deepest valley soil and a showcase of vineyards at 2000 plus feet elevation! Fruit stands, historical points of interest and acres upon acres of fertile land are in between it all. At all the stops, samples are available as well as products to buy and bring home to remember your trip through Tehama County. Some of the businesses are open seasonally but most year round, and all are showcased on Passport Weekend in early June, more information can be found at www.tehamatrail.com.

Both the efforts of the Tehama Trail and the group behind the branding effort, have united to create a platform for agri-tourism to take hold even stronger in Tehama County. These efforts will make visiting this area easy, attractive, and educational. Agriculture and natural resources are the foundation of our county and we want to share our area with you. Stop by soon! More information can be found at www.visittehamacountry.com
