## WASTE AWARENESS E-NEWSLETTER

WASTE AWARENESS THROUGH EDUCATION

September 2022

### Did you know...

- 1 person creates almost 5 pounds of trash every day!
- An aluminum can is able to be recycled into a new one and put back on the store shelf in just 60 days.
- Glass and metal can be recycled over and over again without losing quality.

FALL INTO  
WASTE AWARENESS

The 4Rs of waste awareness are Reduce, Reuse, Recycle, and Rebuy. *Reduce* minimizes the amount of trash generated. *Reuse* extends the life of an item before it is disposed of. *Recycle* turns waste into new materials. *Rebuy* encourages consumers to buy items that are reusable and durable.

To learn more about the 4Rs, schedule a visit of the **4R Kids Exhibit Bus** by contacting the [Recycling Coordinator](#) or calling (530) 528-1103.

**REMEMBER: EVERY ACTION  
MAKES A DIFFERENCE**
